Please review your more recent decisions, and keep in mind that the people of this country are your clients, not corporations. Corporations need to be regulated - severely. We now have bad situations which you should protect us from:

- * only slight competition in local radio: diversity and quality are DOWN, and commercial time is UP;
- * cable rates have skyrocketed;
- * TV networks now are part of conglomerates. and their production and news operations are beholden to commercial interests.

Please selling out the country.
